Woodbridge Foam Blenheim

140 Cathcart St
Box 700
Blenheim, On
N0P 1A0

519-676-3626

Brooke Bellamy
CAW Plant Chairperson
Union Office:

Woodbridge Foam Corporation was founded on October 31/1978, from a single plant in Woodbridge, Ontario to 62 facilities in 58 cities and in 21 countries. The Blenheim unit located at 140 Cathcart Street was opened in 2003. Currently we have 25 hourly employees on the floor in a 2 shift rotation, but in peak times we had over 100. Like everyone else we are trying to survive hard economic times and have many on layoff.

The Blenheim unit produces headrests and armrests as well as foam products through 3 types of processes. We have a conventional line, assembly line and a foam in place line. Blenheim supplies headrests to Qualtec (Cami) for the Equinox/Torrent, Setex for the Acura MDX, as well as Ford - St. Thomas and Toyota.
